The work of improving the Old Park by planting trees and beds of shrubbery, has been resumed this spring; also the grading round the fountains and other works of a general character, all of which tends toward the permanent improvement of the whole. Extensive planting in the East Park, in the immediate neighborhood of Woodford, has been completed; new beds of shrubbery and many other improvements have been made.

The bluff along the drive south of Strawberry Mansion has been planted with hemlocks and other evergreens, with a view to cover the rocky banks. This planting has been extended as far as the Falls Bridge.

The planting begun last fall at Simpson's Mills has been completed, and the banks sodded and sown down in grass. The Nursery has received a thorough overhauling; many of the young trees have been transplanted, and many seeds sown, the whole being in good condition.

The Photograph Building, on Belmont Avenue, has been removed, and the ground graded and sown down in grass, and will be ready for planting in the autumn.

The broad promenades alongside the sunken garden in front of Horticultural Hall, has been surfaced with asphalt. This is a great comfort to visitors as well as an improvement to the grounds. It is especially noticeable that when this kind of walk has been laid, visitors respect the grass borders. Gravel, although very pretty and harmonious in color, is not at all times pleasant to walk on; hence, the borders alongside such walks are always trodden bare, presenting an unsightly appearance, quite at variance with the neatness so desirable in well kept grounds. The asphalt walk is always dry and clean, and, although somewhat expensive at first, is most economical in the end, as it does not need the repairs which the gravel walk constantly requires.

The work of arranging and planting the botanical collection on the ground lately occupied by the Centennial Exhibition, is progressing favorably. The trees and shrubs that were set out last autumn are all doing finely, and the same may be said of all the planting done last year. This desirable result is partly owing to the unusually mild winter and subsequent

genial spring, and also to the great care exercised by the several foremen who have been entrusted with the work. It gives me great pleasure to state this fact, as, without such care and valuable aid, success is by no means certain. The work of planting out the bedding plants for the decoration of the Park, has begun in earnest, with the reasonable expectation of there being a brilliant exhibition of flowering and foliage plants during the present summer and following autumn. These plants number about 120,000, all of which have been raised in the several propagating houses of the Park.

The plot of ground occupied by the U. S. Government Building during the Centennial Exhibition, has been regraded and sown down in grass, preparatory to planting this portion of the Arboretum next autumn.

Fountain Avenue, between Belmont Avenue and the Catholic Fountain, has been regraded, laid out, and planted with handsome beds of shrubbery, which will be rendered yet more beautiful by the introduction of flowering and foliage plants during the coming summer. This portion of the Park, surrounding the lake, is now peopled with several species of wild fowl, Trumpeter swans, wild geese, ducks, etc. These prove to be a great attraction to visitors, and add very much to the beauty and adornment of the grounds.

Much work has been done during the late fine weather alongside the drive leading to George's Hill, including a handsome belt of planting along the base of the reservoir. This work has been prosecuted with great vigor, and the improvement is quite noticeable and will be more marked, when, in due course of time, the designs contemplated by the Commissioners shall have been completed.

The botanical lectures by Dr. Rothrock, of the University of Pennsylvania, that were so highly appreciated last year, are continued this season in the lecture room of Horticultural Hall, every Saturday evening at 4 o'clock, and are crowded by eager listeners, and are highly appreciated. At the request of the Commissioners, cuttings of bedding plants have been sent to Thos. E. McCollom, Assistant Civil Engineer, U. S. Navy Yard, League Island, and to the Managers of the House of

Correction. Cut flowers have been sent to the Philadelphia Flower Mission.

The tabulated accounts accompanying this report, show the condition of the nursery, the number of trees and shrubs planted, the presentations, exchanges, etc. The numerous list of presentations, shows conclusively the great interest felt by the public in the advancement of horticulture in the Park.

In conclusion, I wish to embrace the opportunity thus offered to express my sincere gratitude to many citizens of Philadelphia, and to many kind friends at home and abroad, for their valuable aid and counsel so generously tendered.

To the Honorable Board of Commissioners and to the Superintendent of Fairmount Park for their generous assistance, and their many kind words of encouragement and approval, I tender my sincere thanks.

Very respectfully,

Your obedient servant,

C. H. MILLER,

Landscape Gardener.

May 24th, 1878.

APPENDIX.

JESSE GEORGE AND REBECCA GEORGE.

These names will always be united with that of Fairmount Park, as donors of George's Hill.

That hill, on the west side of the Park, is a spur of the first ridge west of the Delaware of all that rise and traverse our State in a parallel direction, between this city and the Alleghenies. It commands a view, as far as the eye can reach, over the Schuylkill, the City, the Delaware and New Jersey. It is crowned by a spacious Concourse, a beautiful Garden and Summer Temple.

On December 11th, 1868, Jesse George, accompanied by his friend Samuel L. Snedley, appeared before the Committee on Land Purchases; those present being Phillips, Browne, Castle and Price. He stated the terms upon which he and his sister desired to donate the eighty-three acres, including George's Hill, as part of the Park. The reservations of annuities for their respective lives was, obviously, but to enable them to increase their charities in other directions. It was a very beautiful sight to witness this scene, always to be remembered by those present, of an old man aged eighty-three yet hale, with countenance beaming with benevolence, as he contemplated the pleasure that he at that moment was to give irrevocably to millions of persons then living, and to billions yet to be. He said, we give this land for the health and enjoyment of the people forever; and should be glad if our example should influence others to do as we are doing.

On the 22d December, 1868, Jesse George and Rebecca George executed deeds to the City in fee, reserving an annuity to him of four thousand dollars, and to her of one thousand dollars; being proportionate to their ownerships, and equal to the interest on a moderate valuation of the lands. These annuities ceased with their lives. The deeds are recorded in Book J. T. O, No. 207, pages 1 and 6.

On the 24th June, 1869, Lansdowne Drive was formerly opened to the Concourse on George's Hill, in presence of the

Judicial, Executive and Legislative Authorities of the City, and of Jesse and Rebecca George; and there Jesse George, in behalf of his sister and himself, welcomed the assemblage, and gave expression to their continuing satisfaction in what they had done. See these proceedings in the Report of the Park Commissioners to Councils for 1870, pages 13 and 53.

The same report contains the account of the death of Rebecca George, on the 10th of November, 1869, in the seventy-ninth year of her age, and the resolutions of respect of the Park Commissioners: pages 13, &c.

The following proceedings of the Park Commissioners are the final act of the pleasing history of the acquisition of George's Hill; for though we most sincerely mourned the loss of a great and good benefactor, we had seen that in his life and death he was happy in what he had done. But few, indeed, are permitted to live their last years and to die in the like happy consciousness of having done so much good; that good to make so many happy in all future time.

OFFICE OF THE
COMMISSIONERS OF FAIRMOUNT PARK.
Philadelphia, February 15th, 1873.

At a meeting of the Commissioners of Fairmount Park, held this day the following Resolutions were adopted, viz:

The President announced that the object of the meeting was to take action in reference to the death of Jesse George; when Mr. Eli K. Price offered the following resolutions:

Resolved, That the Fairmount Park Commissioners have heard with profound sorrow of the death of Jesse George on the 14th day of February, A. D. 1873, in the eighty-eighth year of his age, at his ancestral home.

Resolved, That as an exemplary citizen of great worth and public spirit we will cherish the memory of his virtues while we live and will make this record of them to last when we also shall be no more.

Resolved, That in behalf of all the citizens of Philadelphia and of Pennsylvania we again acknowledge our deep debt of gratitude to Jesse George, for the donation of George's Hill, as a part of our great Park, a domain when given to us of the saleable value of one hundred thousand dollars; but as a part of the Fairmount Park of a value that can not now be computed in money.

Resolved, That as at that spot will be gathered the people from all parts of these United States, to celebrate the Centennial Anniversary of our nation's

independence, on the 4th day of July, 1876, we ask all our fellow-citizens to unite in this our expression of sympathy and gratitude.

Resolved, That as Jesse George was the last of the generations of the name who owned George's Hill and its surrounding lands, since the time of William Penn, we can offer no condolence to any descendant from him; yet we do accord our sincere condolence and sympathy to his relatives, family and neighbors, who in him have lost a most kind and valued friend.

Resolved, That as he was a member of the Society of Friends, we think we shall most fittingly show our highest respect for the beautifully simple and good life and character of Jesse George, by avoiding all outward tokens of mourning, other than to attend to his funeral, which we will do in a body at the time and place appointed.

Resolved, That while Jesse George would have been among the last to court fame, or to desire that any monument should be erected to his memory, and we know that he made his good gift in a simple benevolence of heart, and, to use his own words, but "for the health and enjoyment of the whole population of this great city," he did that, unconscious of such purpose, for his name and fame which is more than marble monument or "storied urn" could ever do, to perpetuate in the minds of the people the memory of a good life and generous deeds.

Resolved, That we feel this day assured that the prayer expressed by this Commission in the presence of Jesse George and his sister and co-benefactor Rebecca George, on George's Hill, when opened to the public, has been answered; "That you may through all of a calm and peaceful life enjoy great satisfaction and solace in contemplating the good you have done, and that also in a better country, you may both be permitted a retrospect of that never-ceasing good, and thence derive a higher happiness, with the benediction there pronounced upon the good who have served well on earth their fellow beings:"

Which were read; when Mr. Welsh moved that they be adopted as expressing the feeling of this Commission; which was agreed to.

Mr. Price moved that as Jesse George has left no near relatives a copy be sent to his executors; which was agreed to.

On motion adjourned.

R. W. ROBBINS,
Secretary.

The above is a true extract from the minutes.

The Will of Jesse George devoted nearly all his estate to charities, largely through his Executors, John M. George, Joseph W. George, Samuel Mason and Samuel M. Bines, who were empowered to select the objects of distribution of the residue.

After paying \$26,300 to relatives and friends, the residue of \$624,082.23, first deducting expenses and collateral taxes, was paid among the many good charitable Institutions of the City, named in the Will, or others as selected in the discretion and judgment of the Exeutors.

The people of Philadelphia will be interested to know something of the ancestry of one who has been so largely their benefactor. The Friends of Wales had suffered the like persecutions with their religious brethren in all parts of Great Britain, and sought an asylum of liberty here immediately after the first coming of William Penn. The Proprietary caused a survey of forty thousand acres of land to be made for them, from the Schuylkill westward, excluding Liberty Lots near the City; and in and after the year 1682, the townships of Marion, Haverford and Radnor were rapidly settled by Welsh families. They expected to have a separate Barony or Palatinate, wherein to administer their own laws and preserve their native language; but others made purchases among them and they were disappointed in their expectation. [1 Penna. Archives, 108; Proud, 220; Dr. Smith's His. Del. Co. 164.]

One of these early Welsh settlers was David George, whose name appears on John Reed's map and list of first purchasers, as one who took up twenty and ten acres, and on the map the land appears to have been located at the south-east side of George's Hill. It was acquired from Isaac Warner by deed of June 28th, 1729.

The tract of land containing two hundred acres including George's Hill, was on 23d of March, 1701, patented to Hugh Roberts, who by will dated 25th of 5th Month, 1702, devised the same with other adjoining lands, to his son Edward Roberts.

Following briefs of title, I find that Edward George, another Welsh settler, acquired contiguous tracts, as follows: Deed, October 23d, 1721, from Edward Roberts for "Chestnut Hill," containing three hundred and twelve acres, including "George's Hill," as now named. Deed, January 25th, 1737, from Hugh Thomas, for twelve-and-a-half acres. Deed, January 16th, 1839, from William Allen, for twelve acres, one hundred and thirty-eight perches. In 1747 said Edward George devised his

lands to his brothers, David George, George George and Richard George; April 25th, 1759, David George devised his estate to his son Jesse George; George George died in 1765 intestate, and his eldest son David elected in the Orphans' Court to take his father's real estate. The then owners, in 1765, made partition, and Richard conveyed his share in the southern one hundred and thirty acres to Jesse and David George, and they their share in the northern sixty-two and three-quarters acres to Richard George; who in 1771 willed his estate unto his nephew Edward, son of his brother George George; and in 1785 said Jesse devised all his share of land, by his uncle Edward George devised to his father and by his father to him, unto said Edward George, and also after the death of his wife, all the rest of his land, unto his cousin, the said Edward George; and David conveyed all his share of the one hundred and thirty acres to his brother, the said Edward George. The latter also thus acquired the thirty acres which Jesse's father David had owned, and by purchase obtained other Liberty Lots, one for thirty-seven acres, one hundred and thirty-seven perches, and two for ten acres each. When this Edward George's property was divided in 1836, under his will dated 8th Month 23d, 1825, it consisted of four hundred and twenty-four acres, one hundred and sixteen perches. By this partition and later acquisitions, Jesse and Rebecca George became seized of George's Hill and surrounding grounds; the Hill having come through both the Edward Georges.

Proud's History of Pennsylvania says of Hugh Roberts, the first owner of George's Hill by a patent, that he "was an eminent preacher among the *Quakers*; a man of note and good character in Pennsylvania, to which he removed from Wales about the year 1683." "He had suffered much for his religion in his native country prior to his removal to America. He is said to have been of a tender and affectionate disposition of mind, and a very valuable and worthy person. He was for a number of years in the Provincial Council, &c.," I, 221. The Memorial of Friends said of him: "His Doctrine in the Meetings of God's People dropped as Dew, and his speech as small Rain upon the tender Plants; for in the Opening of Life things

both new and old came forth of the Treasury of Wisdom, and his Testimony was comfortable to the Hearts of the People, in the Sense of God's Love, who is the Author of all Good to his People; a Man zealous for Good Order in the Church, and skillful to accommodate differences when they happened." "He departed this life the 18th of the 6th Month, 1702, and his Body was buried at Merrion the 20th of the same." Memorials, 250.

Thus the title of "George's Hill" from 1682, when it was in William Penn, until it was conveyed to the City of Philadelphia in 1869 had always been vested in members of the Society of Friends, and those of but two families, who always lived at and near that centre, as their connections by name and blood now do, in good repute and usefulness among their fellow-citizens. — It is now, and will ever be, a pleasant reflection for the people of our city to know that this finest feature of our beloved Park has come to us with the savor of innocence and sanctity; and may this reflection be an incentive to our successors ever to preserve it, as intended by its donors, to innocent uses, where the intellect and feelings shall at once be refined and raised in aspiration to give thanks to the Giver of this and all Good Gifts; to Him who guides us to all goodness and touches the human heart with the sense of the beautiful.

I am indebted to John M. George and Joseph W. George, relatives and executors of Jesse George, for an account of his American Ancestors.

I. *Richard George* and Jane his wife, and their ten children, of the Parish of Llangurig, Montgomeryshire, in North Wales, embarked on the ship Salisbury, which arrived at Chester, on the Delaware, with the body of Richard George, who had died on shipboard on the 26th, and was buried in the church graveyard there on the 28th of 9th Month, 1708.

Jane survived until 1750, living with her son Edward at the George's Hill place, the object of remarkable affection of her children, who frequently gathered at her residence. Their ten children were born in years from 1686 to 1705, and are here named in the order of their birth:

II. Edward, David, Catharine, George, Evan, John, Jane, Thomas, Hugh, Richard. It is not mentioned that Edward

married; he died 23d of 5th Month, 1748, aged 62 years. Catharine married Joseph Eavenson, and left issue. Evan, Jane, Hugh, John, Thomas, Richard left no issue. David left a daughter, who left no issue, and a son Jesse, who died 8th Month 3d, 1791, inferribly without issue, as he devised his property to his cousins Amos George and Edward George. *George George* married Elizabeth Lewis, 3d Month 9th, 1730, who had children, Ann, David, Thomas, who died without issue, *Edward*, born 3d Month 1st, 1743, and Amos.

III. Edward George married Sarah Williams 3d Month 27th, 1783; they had children, Thomas, *Jesse George*, born 11th Month 23d, 1785, Hannah, Edmund, *Rebecca*, 6th Month 19th, 1780, Sarah, Edmund, David George. They all died childless, and Jesse George being survivor, all the property they left came to him, and from him nearly all came to Philadelphia and her charitable institutions. Amos George left descendants, a number of them now living.

Need we here attempt to portray the life and character of Jesse George? His deeds best declare the character of the man. To say he was a Friend and a farmer, who passed all his life on the paternal homestead, is to say that the tenor of that life was peaceful and uneventful. He attained great age; and and that is to say he lived temperately and wisely, and that his life illustrated the principles of his religious society, and so did the final disposition of his property; for he regarded himself as holding in trust that which he considered the gift of the Lord to him and as under his eye to be disposed with his approval. He did as many true Friends had done before him, and will continue to do, according to their ability; giving to charity and public use more freely, when not under obligation to provide for descendants. The names of Logan, Forrest, Cox, Humphreys, Preston, Dawson, Wills, Brown, Grandom, of the Copes, and of Jesse George and his sister, stand in proof.

Most persons would truly consider a world composed of people so good, as tame and uneventful; without the excitements of adventure, commercial reverses, and military achievements; yes, as too peaceful, too good, for the happiness of those who must live on perpetual excitements, changes, romances, mishaps, tragedies and dramatic adventures. Yet the

wise and humane would look upon such a reformed world as a great gain to mankind in happiness; for it would still have the living interest of good and loveable people, kind and helpful, with all evils of life provided against so far as in the power of man; yet still with the interest and pathos that draw us to the sick and dying; but with positive peace and plenty, science and literature promoted, and all nature made ornate by culture, even to the refinements of the flower garden, and the landscapes of the Park. The sweetness of highest culture, refinement of mind and feeling, and the profound religious devotion would remain and be enhanced in a world of reformed and most practical men and women.

With quiet and disciplined minds characterized by good sense Jesse and Rebecca George were benevolently susceptible to the advantages of providing against all the sufferings of humanity, and for the promotion of all human knowledge and means of civilizing culture and refinement of taste, as well as religious worship. To such objects their wealth was mainly devoted. Without a trace of ambition, and with but the intent to do the best good they knew, they have, in their principal gift, left to the City of Philadelphia a natural monument, which art will always embellish, grander and more productive of pleasurable emotions in all the millions who will visit it than all the pyramids, mausoleums, and triumphal arches erected by despotic power and boundless wealth to perpetuate the memory of the names and victories of kings and conquerors. None are so simple, so beautiful, so enduring as GEORGE'S HILL.
